

Software Engineer Intern

MONTREAL, CANADA - TECHNICAL SERVICES

Are you passionate about applying your coding skills to real-world projects? ei3's development team is looking for an individual who is eager to learn about technologies such as the Industrial Internet-of-Things (IIoT) and AI and develop their programming skills in a professional environment.

If you love software development and would enjoy the challenge of deploying technical solutions into real world Industrial Internet-of-Things (IIoT) monitoring, this might be the perfect opportunity for you!

We are flexible: Our philosophy is that we are motivated more if we enjoy what we do — which is why hours are flexible, and why we structure this collaboration to suit your schedule.

Work from anywhere: Face-to-face time and “watercooler conversations” can be combined with remote work to help you be creative, productive, and accommodate your work - life balance needs.

YOUR CONTRIBUTIONS WILL MATTER:

- You will work with ei3 Engineers and Analysts to help maintain and improve our integration testing environment and tooling.
- You will have the opportunity to enhance the quality of the code on the data flow project. You will assist the team in documenting the dataflow project from automation, to testing and deployment and provide real-time insights on necessary modifications.
- You will contribute to the ei3 automation code base and participate in code reviews.

YOUR BACKGROUND:

- Knowledge or interest in test driven development
- Knowledge or interest in DevOps and continuous integration
- Scripting skills using language like bash, python
- Comfortable using Git, Linux based systems and Docker is a bonus

This is a one-of-a-kind opportunity to join a fast-growing organization. If this sounds challenging and exciting, we want to talk to you.

ei3 is an equal opportunity employer. We celebrate diversity and are committed to creating an inclusive environment for all employees.

HOW TO APPLY?

Please send an email to gokhan@ei3.com which includes your CV, a few lines summarizing why this role appeals to you and include links to work examples / projects that you think best represent your voice.

ABOUT ei3:

A global leader in AI dedicated to industrial machines and processes. By focusing on efficiency and sustainability, we help the world produce things better.

Founded in 1999, ei3 Corporation delivers ConnectedAI solutions for machine builders and manufacturers to increase operational efficiency, save on costs, increase profitability, and implement new business models. Printing presses, injection molding machines, and packaging equipment are some of the company's key market segments. ei3 is headquartered in New York with offices in Montreal and Zurich.
